Summary

Junior Software Developer specializing in **web development** with **Django, JavaScript, and** modern UI frameworks. Experienced in building applications and implementing multi-page navigation using **Django**. Strong foundation in **data structures, algorithms, object-oriented programming, and SQL**. Currently pursuing a **BSc in Computer Engineering** at **Politecnico di Torino** and expanding to **AI/ML**.

Projects

[Link] Task Management Web App - Django , HTML, Tailwind, postgreSQL
      Developed a full-stack task management application using Python and web technologies. Implemented features including user registration, task creation/editing, filtering, and state persistence, with a clean UI built using HTML/CSS (Tailwind) and backend logic in Python. Demonstrates proficiency in web development, full-stack workflow, and MVC architecture and CRUD operation.
Source Code: GitHub

[Link] Flight Booking- Java, OOP
      Developed an object-oriented flight booking application capable of managing multi-leg flight reservations to a single destination.
Source Code: GitHub

[Link] Bar – HTML, Bootstrap, JavaScript
      A fun and interactive web application that allows users to discover cocktail drinks using TheCocktailDB API, view their details, and add selected items to a virtual cart.
Source Code: GitHub

TECHNICAL SKILLS:
- Languages: JavaScript, Python, C, C++, Java
- Frontend: JavaScript, Tailwindcss
- Backend: Django (learning), REST API (learning)
- Database: SQL
- Tools: Git, GitHub, Netlify

Education:
Politecnico di Torino , Turin, Italy | Bsc in Computer Engineering | 2022-ongoing
